SUMMARY

Full-stack developer at CentralEng, an HVAC engineering company. I built the technical training LMS that 20 employees use today, and I lead development of the PMOC maintenance management system. Since Oct/2026 I have been a development intern on the Innovation team at Asten AVMB. I study Information Systems at AMF.

HOW I WORK

I write a short spec with acceptance criteria before the code, and the test before the implementation (TDD). Each change goes through a PR, with review and CI running tests, type checks and build. For AI features, I keep an evaluation set out of prompt tuning and run it once, at the end.

EXPERIENCE

Development intern, Innovation team, Asten AVMB — Oct/2026 – present

- I took over the project of a dashboard for the company's internal meetings and take part in other team projects.
- The ticket dashboard is in production and used in management meetings: it imports each month's spreadsheets, stores versioned loads and produces indicators by status and SLA.
- React, TypeScript, Vite, Tailwind CSS, Vercel Functions and PostgreSQL with Prisma; tests with Vitest and Playwright.

Full-Stack Developer and IT Analyst, CentralEng, HVAC engineering — May/2026 – present

- I built the team's technical training LMS, used by 20 employees.
- I lead development of the PMOC maintenance management system.
- I integrate the internal systems and automate tasks the team used to do by hand.
- I look after the IT infrastructure, the databases and user support.

Co-founder, YourMentor — Jun/2026 – present

- A platform that connects mentors with people who want to learn. I run product design, business strategy and the monetization model.

Scholarship teacher, JET Project (Youth and Technology), AMF — Feb/2026 – Sep/2026

- I taught technology to 100 students from 4 public schools, from beginner to upper-intermediate level, and used AI tools with them in hands-on exercises.

Administrative assistant, CentralEng, HVAC engineering — Oct/2025 – Apr/2026

- I organized project documentation, invoices and financial controls, and automated the department's routines.

PROJECTS

leadgate github.com/gomesbeduardo/leadgate

AI lead triage for an HVAC company. It chats with the customer until it has the data sales needs, then sends a validated JSON. The code checks each model answer (Zod and fixed rules) before moving on. About 570 automated tests and a held-out evaluation set, run once. TypeScript, Node.js, Docker, n8n.

Technical training LMS github.com/gomesbeduardo/plataforma-LMS-corp

Course platform with progress per employee, assessments and PDF certificates. The private version runs in production at CentralEng, used by 20 employees. Next.js, TypeScript, Prisma, PostgreSQL, Docker.

InfoHub InovAMF github.com/gomesbeduardo/infohub-inovamf

The entrepreneur's journey from InfoHub (AMF) to InovAMF. Systems Architecture course project, built as a pair. Next.js, TypeScript, Prisma, PostgreSQL.

AWARDS

1st place, Coderace 2026 (AMF) Jun/2026
AgroPlanner, an AI decision-support platform, built as a team: 15 user interviews before any code and delivery within a 10-hour hackathon.

1st place, 1st Information Systems Ideathon at AMF Oct/2025
Team Mentor.Me.

EDUCATION

B.Sc. in Information Systems, Antonio Meneghetti Faculdade (AMF) Feb/2024 – Dec/2028 (expected)

STACK

Languages: TypeScript, JavaScript, Python, SQL
Front end: React, Next.js, Tailwind CSS
Back end and data: Node.js, Express, Prisma, PostgreSQL, Supabase
Quality and operations: Vitest, Playwright, GitHub Actions, Docker, Linux, Git
Integrations: n8n, REST APIs

LANGUAGES

Portuguese (native) · English (advanced)
